

open**IMIS**

The open source tool for digitalization of health financing

LET`S CLOSE THE DIGITAL GAP FOR HEALTH FINANCING!

openIMIS is an open source platform which helps to manage health financing processes.

Seamless integration of stakeholders.

Paperless.

Free.

THE BENEFITS

- Digitize paper work
- Avoid cumbersome excel tables
- Save resources. No need for commercial software
- Benefit from a global good

MEMBER REGISTRATION

Household or individual

Registration on paper or openMIS app

Data saved on local server

HEALTH SERVICE

Patient visits health facility

Patient verification or registration in the database

Patient treatment

Services entered into openMIS claim form

CLAIMS MANAGEMENT

Health facility submits claims via openMIS to payer institutions

Reviewer checks claims and decides: accept or reject

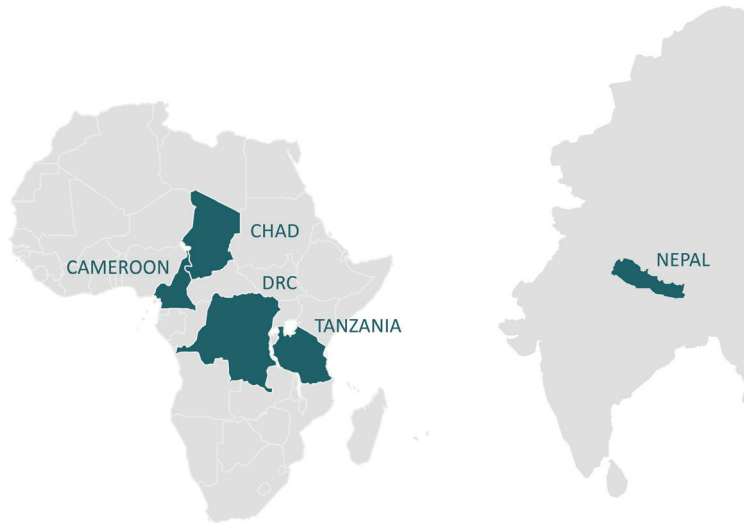

Payer initiates payment to health facility

MONITORING AND REPORTING

COUNTRIES CURRENTLY IMPLEMENTING openMIS

CONTRIBUTION TO UNIVERSAL HEALTH COVERAGE (UHC) AND UNIVERSAL SOCIAL PROTECTION (USP)

More and more countries worldwide are aiming to achieve Universal Health Coverage (UHC) as well as Universal Social Protection (USP) for their populations.

openMIS contributes to advancing the Agenda 2030 of Leaving No One Behind by addressing the SDGs 1,3,9,10,16 & 17.

KEY FACTS

openMIS...

- Is licensed as open source, meaning it is **free** to download, customize and use by **anybody**.
- **Data ownership** remains completely with the institution administering the system.
- Open source **doesn't mean your** data will become open.
- Can be run **without constant internet** connectivity.
- Is a **global good**. It is supported and constantly improved by a **global community**.
- Pursues the **principles of digital development** and the **digital investment principles**.

THE openMIS INITIATIVE

- We provide technical **assistance** and experiences from different countries using openMIS.
- We promote open **access** to technical documentation, demos and training material.
- We welcome interested institutions, supporting agencies, software developers and academia to join the peer-to-peer **exchange**.
- The initiative is funded by the Swiss and German development cooperation. The coordination desk is hosted by GIZ.

WHO SHOULD USE IT?

The users of openIMIS are institutions paying for health care, e.g. health insurance funds or ministries of health.

The software helps to manage:

- Membership/patient registry
- Benefit package (services and prices)
- Contracted providers
- Service claims and reimbursement
- Client feedback
- Monitoring and reporting

STRATEGIC PURCHASING MADE POSSIBLE

openIMIS is flexible and customizable for health systems moving towards UHC and strategic purchasing of services.

By linking patient and provider data, it allows digital information flow and processing.

openIMIS can be used for

- Health insurances schemes
- National Health Systems (tax funded)
- Output based financing: RBF and P4P
- Voucher schemes
