2020 Season's greetings

Thanks to our community members and all partners of the openIMIS Initiative for another year of inspiring collaboration and bold achievements. Working together as a community, we established new implementations of openIMIS with the Social Security Fund in Nepal, PharmAccess in Zanzibar, and 2M Corp in The Gambia. We have also embarked on key journeys together to improve the functionality of openIMIS with module development for formal sector health insurance and employment injury insurance, and an AI-based claims adjudication module to help melt away claims review back-logs. We aim to deploy all these modules in the new year 2021!

Thanks to your on-going support and work with the community, openIMIS has further progressed in maturity as a global good – check out its maturity score.

We are now wishing you a merry Christmas and a happy turn of the year!

Stay healthy and open source :)
