# What is openIMIS?

openIMIS is an

- **open source** software for improving **health financing operations** by digitalizing the link between **patients, providers and payers**

based on a

- **community** of developers, users and implementers

with the joint mission to

- increase and improve **universal health coverage (UHC)**, eventually looking at **USP**

# openIMIS Workflows

## 1 ENROLLMENT

## 2 HEALTH SERVICE

## 3 CLAIMS MANAGEMENT

## 4 MONITORING AND REPORTING

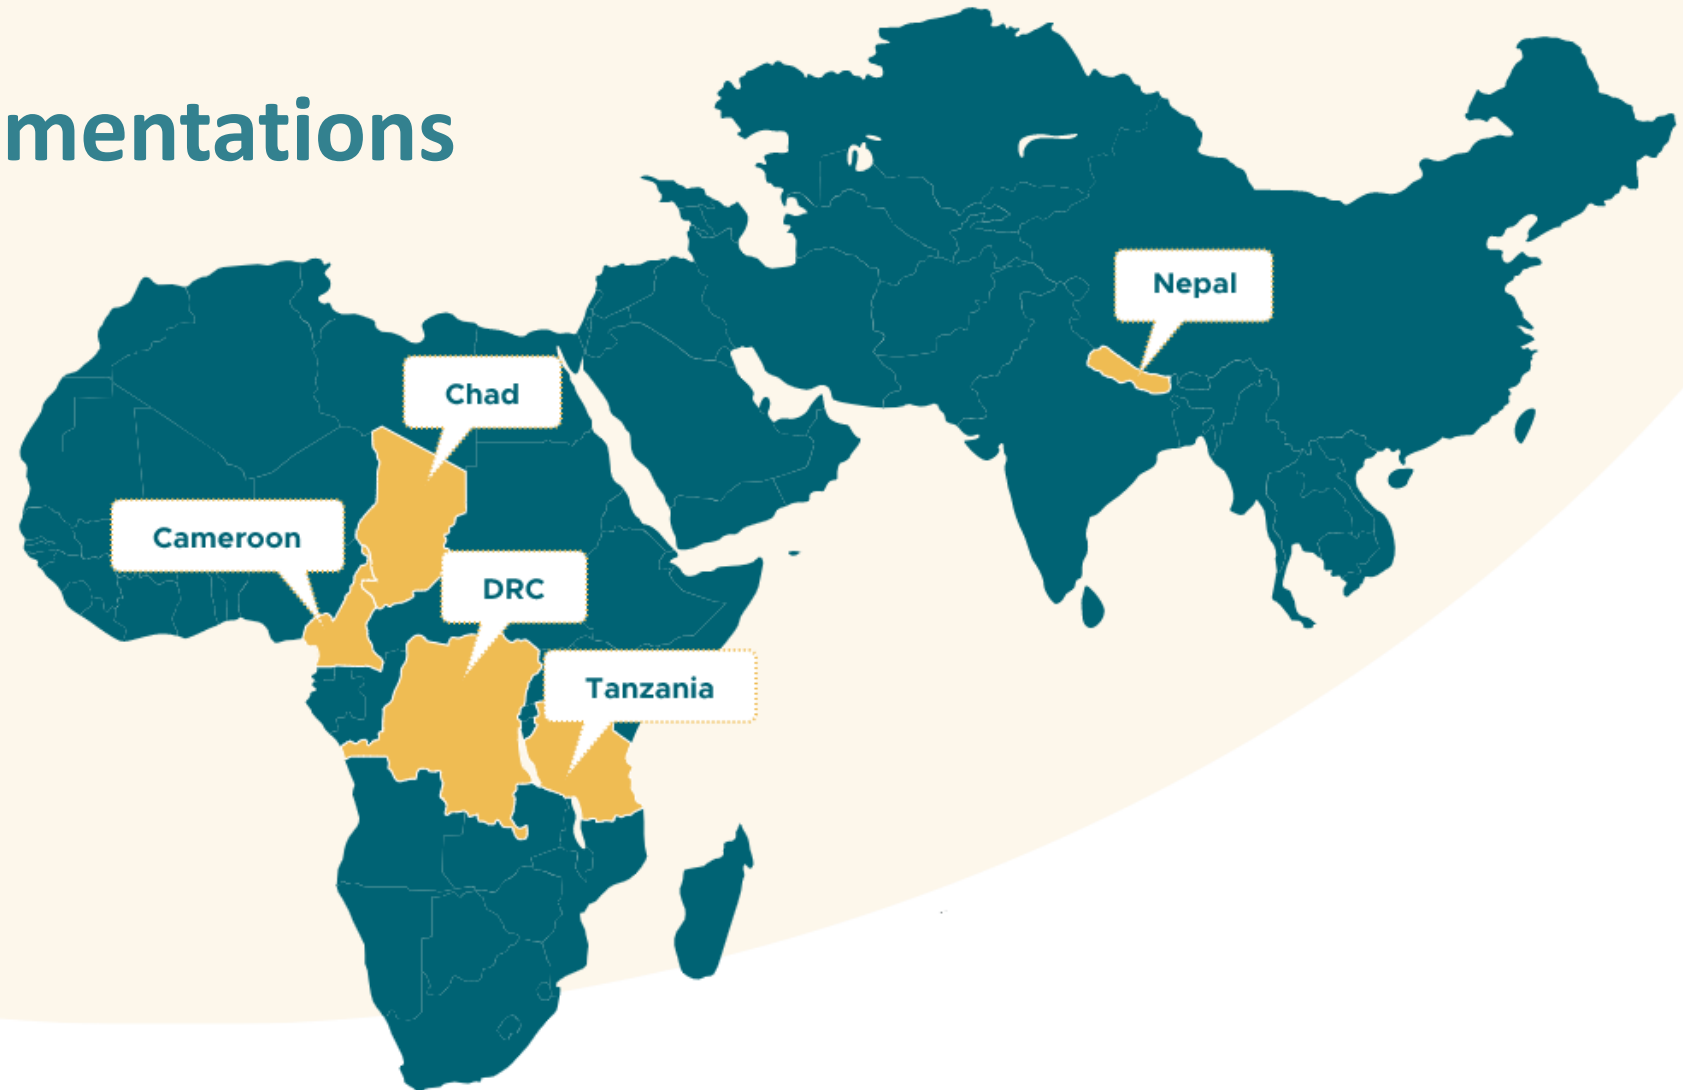

# openIMIS Implementations

Coming up:

- Djibouti
- Zanzibar
- Gambia

Country assessments:

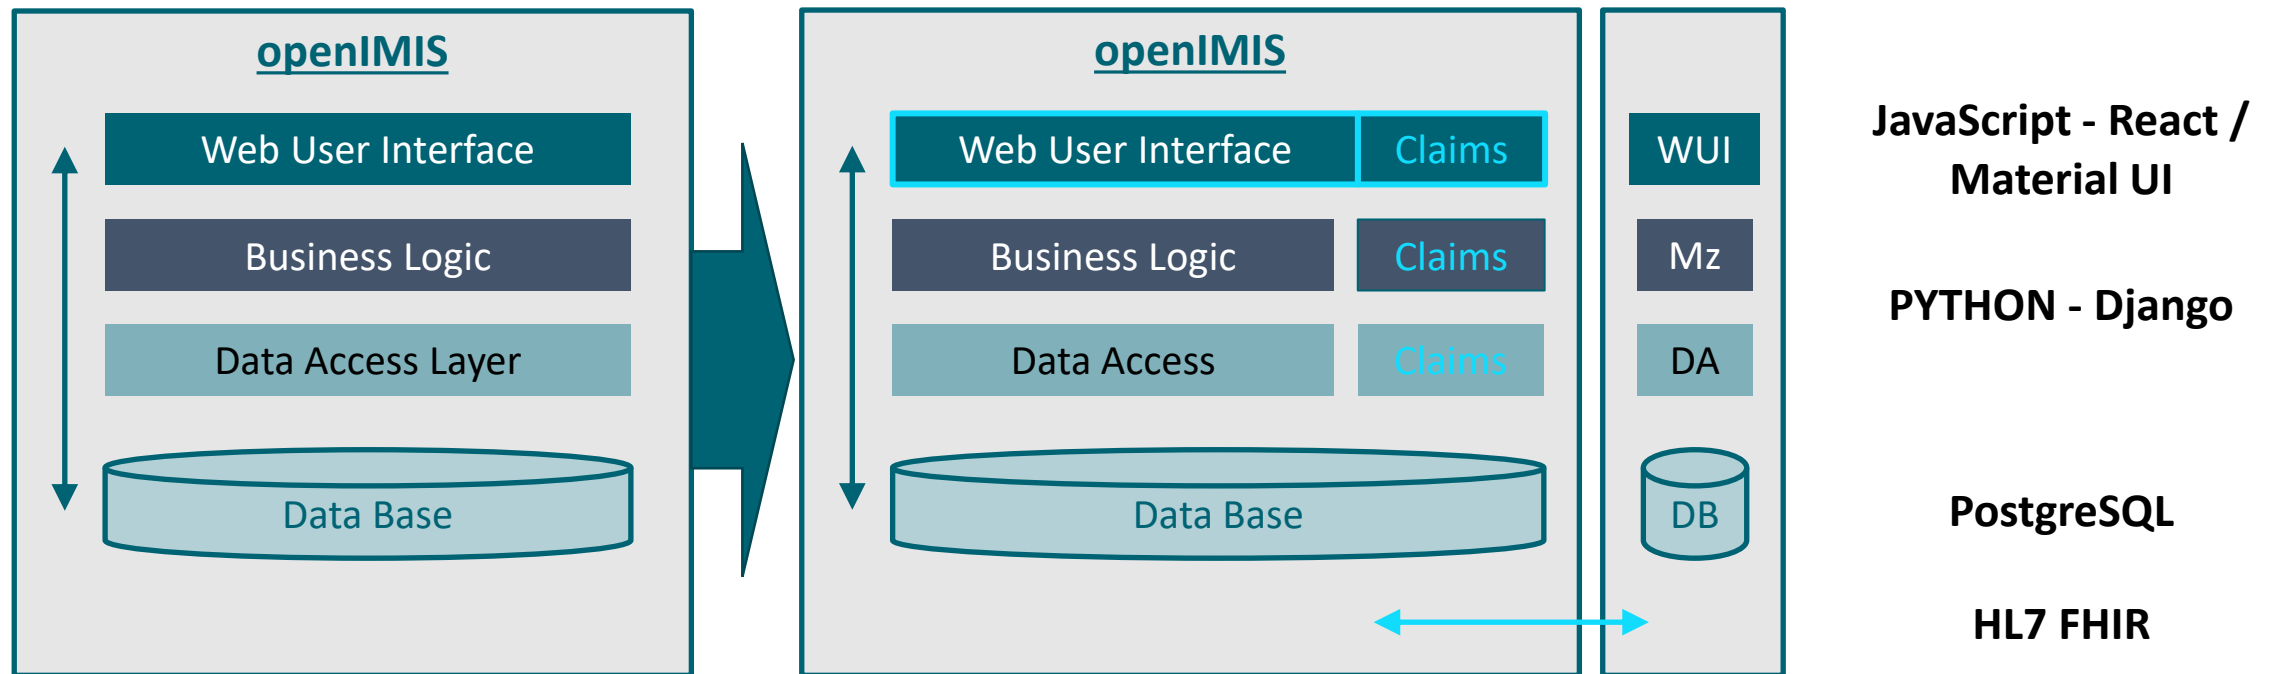

- Rwanda
- Malawi
- ...

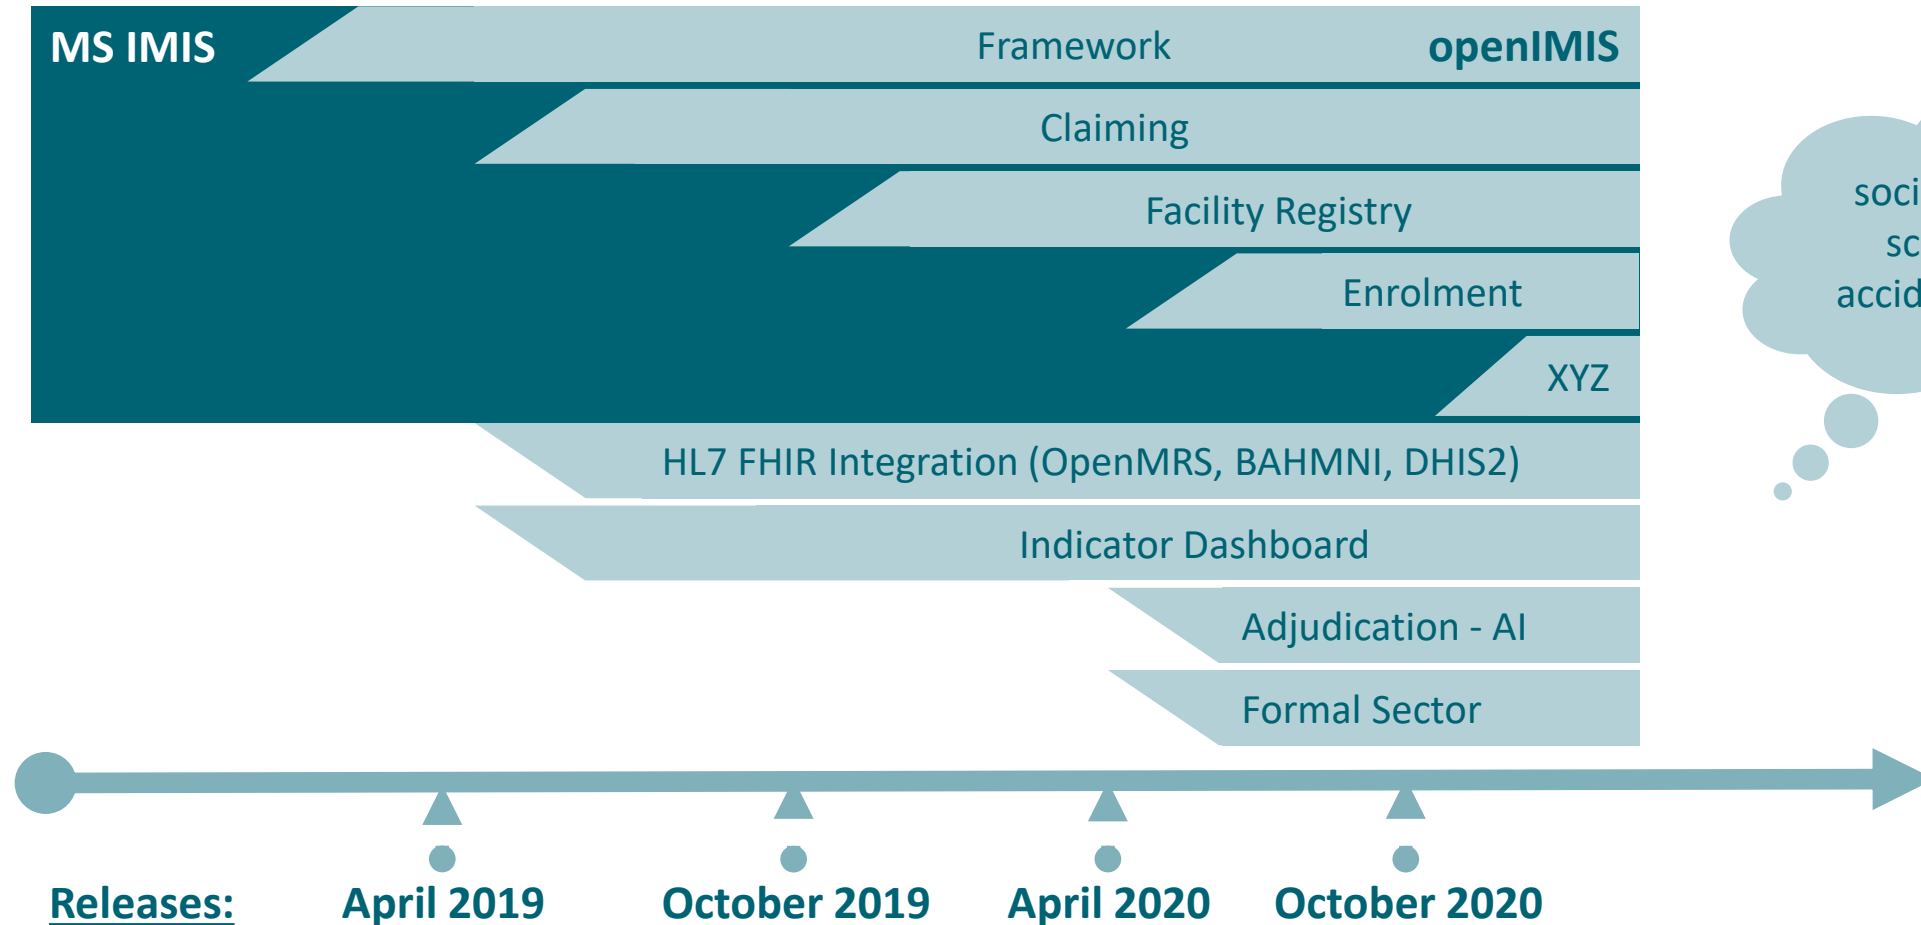

# Modular Transformation

**Monolithic (Microsoft .net)**

**Modular (open source)**

# Slow Transition (Current Roadmap)

social protection schemes e.g. accident insurance

# Current Challenges

- Mixed worlds (Microsoft vs Open Source)
  - packaging, installation, maintenance
- Harmonize concurrent projects
  - Migration vs. new developments
- Community management
  - Keep developers in synch (communication, forking)
- Administrative challenges
  - Complicated contracting modalities -> delays
- Further work items:
  - Harmonization of licenses, system hardening, hosting landscape, ...
