

Vision and mission of openIMIS Initiative

Vision statement of openIMIS Initiative (based on SGM March 2018): “The implementation of a continuously improved open source Management Information System for social (health) protection schemes (openIMIS), will lead to effectively managed insurance schemes and other financing mechanisms, and ultimately to UHC and USP.”

The **Mission** is to: “Continuously and collaboratively develop shared, open-source software to improve data and information management of (health) insurance and other financing mechanism for universal health coverage and universal social protection in low and middle-income countries, making openIMIS product a freely available Global Good”

Marketing messages to external audiences

.... to scheme operators, other CoP / networks in health / social protection, academia:

openIMIS is an open source solution for the management of health financing schemes and other mechanisms in social (health) protection

.... to scheme operators, other CoP / networks in health / social protection, academia:

openIMIS is a global good in health and social protection. It presents a sustainable digital solution to strengthen Universal Health Coverage and Universal Social Protection.

openIMIS

Joint topics for Community Management

Please, check in the colour scheme which is the colour of your organisation/team.

Task 1: note your work packages on the sticky notes (in the colour of your team). *5min*

Task 2: Identify the interlinkages between your work packages and the related topics on which we need to work together. *20min*

Task 3 (Discussion): Relate those topics to the 'bigger picture' i.e. how openIMIS is presented towards potential users, co-implementers or co-funders. *10min*

Community Expansion

Use cases

- Promotion of openMIS in select AeHIN events
- openimis certification of IT startups
- open course training without and other institutions, groups
- Country Impact in Social protection scheme
- Facilitate information exchange and other activities between the country hubs & transverse user groups and the initiative (ex: Lao convergence)
- Submission of next applications for the operators newsletter
