Capacity Building Efforts

Ensure that existing capacity development and implementation starter kit related resources are brought together and structured into an online course

- Making an inventory of what capacity building material already exists (directory)
- Definition of target audience for the e-learning course
- Assessment of suitable online platforms
- Development of testing and certification for the course
- Support efforts to promote the e-learning course

18.03.2021   3min

E-learning course development

|		
Module 1	Content according to Learning Objectives; interactive elements with self-test(s) for reflexion. TBD: Module must be completed before starting Module 2	
Module 2	Content according to Learning Objectives; interactive elements with self-test(s) for reflexion. TBD: Module must be completed before starting Module 3	
Module 3	Content according to Learning Objectives; interactive elements with self-test(s) for reflexion. TBD: Module must be completed before starting Module n	
Module n	Content according to Learning Objectives; interactive elements with self-test(s) for reflexion. TBD: Modsule must be completed before starting the final test	
Final Test	Final test, covering aspects from all modules; must be completed for a certificate of successful completion of the course	

- 3-5 learning objectives
- Content of the course broken down into several modules
- Each module should be 30-60min long
- Modules are in a logical order
- To be awarded with a certificate of completion a final test must be taken and successfully passed.

LOs expressed with «strong» verbs

After completion of the course, participants are able to:

- Recall the basic features of openIMIS (remembering)

- Utilize the software in there own setting(s) (applying)

- Examine the pros and cons of openIMIS (analyzing)

- Recommend openIMIS to their managers (evaluating)

(Note: these are just examples; the level of learning has to be reflected in the assessment)

Break-out room discussions

Learning objectives/outcomes

Task: think of 2-3 learning outcomes for the e-learning course. What should a participant be able to do after the course? What should they learn to do? To what extent should they be able to talk about OpenIMIS?

Target audience: mid-level managers (government, health insurance companies, NGOs) with basic health financing & ICT knowledge

Time: 13min

Additional Capacity Development Needs

- What additional capacity development needs to you see for the future?

- What kind of topics would you like to be covered?
  - Installation of openIMIS
  - Interoperability (integrate into other platforms)
  - Data privacy
  - Health financing

- What types of teaching modes would you like?
  - Webinar
 - In-person training
  - Online course
