what we will deliver and what are our dependencies
- openMIS implementation
Updates about openMIS implementation opportunities

Achieved this month

Strategy for the final migration

- Published on the Wiki on 15 April:

<https://openimis.atlassian.net/wiki/spaces/OP/pages/2501935139/Draft+Strategy+of+the+Final+Migration>

- No feedback received
- Considered as approved - but possibility to make it evolve as needed
- Work has started on **user management module**

Deployment Support

- A few issues encountered by Nepal have been identified and fixed
- Performance under improvement

Roadmap

User Management Module (incl key user utilities) - deadline 1 June 2021

- Maintaining user types for compatibility:
 - Interactive Users
 - Technical Users
 - Claim Administrators
 - (Enrolment) Officers
- Unified API to join them
- Legacy authentication carried over (salted SHA256 👍)
- API for administering and for user self-service
- UI to be provided as soon as possible

openMIS implementation

OpenMIS implementation

PBF/openMIS integration in Cameroon

- Proposal has been sent to MoH including openMIS/PBF integration

More and more opportunities for openMIS are emerging as both the product matures and many countries digitize their health systems.

Bluesquare team

- Eric Darchis Lead Senior Dev
- Christophe Gérard Senior Dev
- Christine Verstraete Health Financing Lead PM
- Laure Pontis PM
- Change requests => Jira: [openMIS Jira, project "OMT"](#)
- General discussion and exchanges => openimis-implementers-committee@googlegroups.com
openimis-developers-committee@googlegroups.com
- Feedback on mocks/testing => [Wiki https://openimis.atlassian.net/wiki/home](https://openimis.atlassian.net/wiki/home)
- All other => PM (Christine and Laure) cverstraete@bluesquarehub.com lpontis@bluesquarehub.com

Thank you!
