292	ClaimAdmin model moved to Core module	A	User requires claim.ClaimAdmin => move it to core?	10.02.2022
293	Authentication	I	● Since Blsq modified the authentication so the frontend adds the JWT token to every call, the PDF download and file attachments stopped working as they're links opening directly into the browser => no authorization header passed. ● Blsq therefore changed the authentication system to use cookies. This led to a rewrite of the jwt_authentication that checked the various "bearer/basic/remote_user" auth. It is much simpler now and should work with basic auth, remote_user and bearer. ● PR are out, would love feedback on each team's use cases. ● cookies? https://gdpr.eu/cookies/ > See "Strictly necessary cookies" (these are only session/language management cookies, no tracking) GDPR states that we don't need consent but should inform about the cookies. ● We could provide that info in general terms & conditions or provide an optional way to show a banner on first visit (that would require another cookie).	23.03.2022
294	Camera access from webapp	A	● Registration with pictures through the WebApp? ● Using the browser access to camera ○ https://www.digitalocean.com/community/tutorials/front-and-rear-camera-access-with-javascripts-getusermedia	31.03.2022

			○ https://codepen.io/chrisbeast/pen/ebYwpX ● No real advantage in offline mode (can use mob. app) but in branch offices with registration at the counter	
295	OpenMRS/BAHMNI FHIR		● openMRS/BAHMNI FHIR needs to be updated to FHIR4 - workload and funds (Notice F2?)? (FHIR3 still works, though) ● estimation? ● synchronise with Possible Health implementation	31.03.2022

301	Split database user	A	Consider splitting database user of the webapp and the more advanced user. Right now, the documentation says to create imisuser with db_creator role. The user also has the right to create backups and restore them. The legacy app allows admins to give a path like c:\openimis\foo and dump a file there. Or load the database from such a path. This is a big risk for security. Even if it is restricted to Admins, combined with another flaw, it might have very bad effects	03.03.2022
302	Locust.io	I	● For Performance testing, Blsq made a Locust script that can hammer the (GraphQL) API. It supports both legacy and modular logins. (not that easy) ● The script will probably be in the openimis-be_py repo but it might become a full repo because it will evolve independently from releases	10.03.2022

304	dj module from oi modules	A	● Add django modules form openimis modules ● this is not only about loading py modules, it neeeds to be part of the DJANGO_MODULE in the assembly settings.py	31.03.2022
305	App Homepage	D	● capability for widgets was added for each module ● which would be useful elements for the intro page of oepnIMIS? ● wait for groups?	31.03.2022
