301	Split database user	A		Consider splitting database user of the webapp and the more advanced user. Right now, the documentation says to create imisuser with db_creator role. The user also has the right to create backups and restore them. The legacy app allows admins to give a path like c:\openimis\foo and dump a file there. Or load the database from such a path. This is a big risk for security. Even if it is restricted to Admins, combined with another flaw, it might have very bad effects	03.03.2022
302	Locust.io	I		• For Performance testing, Blsq made a Locust script that can hammer the (GraphQL) API. It supports both legacy and modular logins. (not that easy) • The script will probably be in the openimis-be_py repo but it might become a full repo because it will evolve independently from releases • needs to be extended • create docu and integrate into : https://openimis.atlassian.net/wiki/spaces/OP/pages/2501804037/openIMIS+Testing+Scenarios • Other mechanism: https://github.com/openimis/openimis-be_py/tree/develop#to-get-profiler-report-debug-mode-only • also looking at REST API • wiki-doku: https://openimis.atlassian.net/wiki/spaces/OP/pages/3307175937/Stress+Performance+Testing	21.07.2022
304	Django module from oI modules	A		• Add django modules from openimis modules • this is not only about loading py modules, it needs to be part of the DJANGO_MODULE in the assembly settings.py	12.05.2022

311	Mobile Offline extracts	A		• We decided not to include the web offline mode extracts but the Mobile app extracts and imports are necessary (and missing) • They are actually included into the April release but not shown in the frontend. There are some issues with the existing system and mobile apps, so Bluesquare is currently testing this and making sure that it's available. • Implemented in front and back, with rewrites of stored procedures • Missing end-to-end testing on some features • data for testing needed	01.09.2022

312	UI-Wording	D	• Automated translation done with verification (on all terms extracted) • Who decides on wording in user-interfaces for the standard version? • address this question to implementers • Discuss: Who is responsible?	01.09.2022
