301	Split database user	A	<p>General page on access https://openimis.atlassian.net/wiki/spaces/OP/pages/3530162177/Access+management</p> <p>Consider splitting database user of the webapp and the more advanced user. Right now, the documentation says to create imisuser with db_creator role. The user also has the right to create backups and restore them. The legacy app allows admins to give a path like c:\openimis\foo and dump a file there. Or load the database from such a path. This is a big risk for security. Even if it is restricted to Admins, combined with another flaw, it might have very bad effects</p> <ul style="list-style-type: none"> • what was this about: 	25.01.2024
