Health insurance schemes are spreading in low and middle-income countries. However they often fail to achieve scale as they lack the organizational, human and technological resources and capacities. **openIMIS** facilitates enrolment, helps process claims and makes reimbursement more manageable, efficient and transparent. **openIMIS** is available **for free**. It can be **customized** for different needs and **brings together** valuable healthcare provider, patient and insurer **data in a compatible way**.

Here's your chance to learn more about the **openIMIS Initiative** at DayOne Conference!

🕘 **9 AM - Session 1 - Making healthcare innovation happen**
Helen Prytherch of Swiss TPH will discuss the benefits of innovative IT-solutions such as **openIMIS** in a panel discussion

🕐 **1:15 PM - Session 3 - Hands on**
Catch SDC's Alexander Schulze making his 60 second pitch for **openIMIS** and Siddharth Srivastava (Swiss TPH) facilitating the design process thereafter
